Building a Vibrant National Network

New Tech Network, a national non-profit organization, is a leading design partner for comprehensive school change. We don't operate schools; we work closely with districts and schools to create innovative learning environments. Through a proven school model, a project-based learning platform, and powerful professional development, we coach schools toward lasting change and ongoing improvement.

There are nearly 200 elementary, middle and high schools in 28 states and Australia.
